

PERMASHIELD

Water-Base Graffiti Control Systems

We have three forms of Anti-Graffiti Protection: *Permashield Sacrificial*, *Permashield Non-Sacrificial*, and *Permashield Premium*.

PERMASHIELD SACRIFICIAL

- One-Component Acrylic Modified Wax Emulsion
- Tagging is removed with the use of **Monochem Citrus Clean** or hot water power washer. After removal and drying, it is reapplied to the stripped sections.

*Depending on the application a barrier coat may be required: **Aquaseal ME12**.

#9700

PERMASHIELD NON-SACRIFICIAL

- Available in Gloss or Low Gloss
- One-Component Acrylic Co-Polymer Plastic
- Tagging is removed with the use of **Monochem Citrus Clean**. Permashield Non-Sacrificial can withstand up-to five complete graffiti removals, and then recoating is necessary.

*Depending on the application a barrier coat may be required: **Aquaseal ME12**.

PERMASHIELD PREMIUM

- Available in High Gloss or Matte Finish
- Two-Component Polyurethane
- Tagging is removed with the use of **Monochem Citrus Clean Super**. Permashield Premium can withstand 10 years of warranted removals.

*Depending on the application a barrier coat and base coat may be required: **Aquaseal ME12** and **Permashield Base Coat**.
