

U.S. SPECIALTY COATINGS

FEATURED PROJECT

MONOCHEM 21 100% Solids High Build Epoxy

Monochem 21 is a two component, 100% solids high build epoxy. This coating can be used as an interior finish coat or a primer that displays top tier adhesion to non-abraded water, oil, solvent, alkyd and unknown coatings. Non-porous surfaces like glazes, shiny concrete, or glossy coatings do not require abrasion either. Monochem 21 also has great chemical and hot tire resistance.

Project Name:
BMW North America
Oxnard, CA

Supplier:
Vista Paint

Completion Date:
May 2013

Coating System:
Primer/Top Coat:
Monochem 21
100% Solids Epoxy Primer
3 mils DFT

FEATURES:

- Easily Adheres to Non Porous, Sealed, or Water, Oil, Solvent, Alkyd, and Unknown Coatings
- VOC Compliant
- Environmentally Friendly
- Superior Durability
- Low Odor
- High Tensile Strength
- Hot Tire Resistant
- Recoatable
- Solvent Free
- Top Tier Chemical, Abrasion, and Hot Tire Resistance
- Very Strong Bond to Concrete, Wood, Metal, Existing Coatings etc.
- Warranties are Available
